

MULTI DECK CART EASY TO ASSEMBLE BY USERS

ABSTRACT

5 A cart includes a bottom holding unit, two lateral plates detachably
joined to lateral edges of the bottom unit at lower ends, several spaced
upper holding units detachably joined to the lateral plates at two lateral
ends, a handle detachably joined to one of the lateral plates, and wheels
detachably joined to a lower side of the bottom unit; each holding unit
10 has a horizontal plate, and two wall portions, which are detachably fitted
to front and rear edges of the horizontal plate, and which are detachably
connected to the lateral plates at two ends; the cart is in dismantled
position with the above various plates being stacked up so as to occupy
less space before the user assembles it.
